Scenes from an Automotive Wonderland Gregory A. Cagle 2018-01-09
“Filled with the black-and-white photographs [Cagle] took, along with make and model information and personal commentary on unusual automobiles that have since all but disappeared...Cagle makes it easy to feel the excitement and enthusiasm he felt as a young boy. Any car spotter will enjoy this book, and may find a 26 horsepower favorite. The book is presented in a pleasant, easily readable format... recommended”—Choice “A gamut of wonderfully rare and unusual photographs...a book with so many unusual cars and scenes that it boggles the mind...a must read”—SAH Journal “This books is a collection of [Cagle's] photographs with extremely informative descriptions and a history of each car. The writing is very personable and engaging...very well researched.... Recommended—ARBA “Features 105 specimens of auto exotica.... An interesting examination of automotive esoterica”—Vintage Roadcar “This is exactly the sort of material that take you back to the fifties, or shows you what the streets of Europe

looked like at that time. Cagle has meticulously researched the cars in this book...his style of writing is pleasant, informative and humorous. He avoids the usual mistakes you can find on the Internet, and paints the wider picture, without becoming pedantic”—Rumcar News Gregory Cagle was a 10-year-old car fanatic when his family moved from New Jersey to Germany in 1956. For the next five years he photographed unusual, rare and sometimes bizarre automobiles throughout Europe. This book features 105 specimens of auto exotica, captured with Cagle's Iloca Rapid-B 35mm camera—not showpieces in museums but daily drivers in their natural habitats. In the background can be glimpsed, here and there, the mood of postwar Europe. The story behind each photo is told, with dates and locations, information and history about the cars and some of their owners, along with Cagle's personal anecdotes.

Saab 96 & V4 Graham Robson 2010-04-15 The front-wheel-drive Saab 96 made the brand into a rally icon in the 1960s. It succeeded in events as diverse as the Monte Carlo, Britain's RAC rally, special stage events in every Scandinavian country, and the rough-and-tough Spa-Sofia-Liege Marathon. The big change came in 1967, when the 96 became the V4. Works cars continued to be competitive in carefully chosen events for many years, and when they became outdated, the V4's successors - the much larger and more powerful 99 and 99 Turbo types - proved that Saab wasn't done with rallying yet. More than any other car of its era, the 96 and V4 models proved that front-wheel-drive allied to true superstar driving could produce victory where no-one expected it. *Torque* 2008-03 Singapore's best homegrown car magazine, with an editorial dream team driving it. Customer-Oriented Quality Management in the Automotive Industry
Marit Breithfeld 2005-02-28 Inhaltsangabe:Abstract: In times of severe competition, it is of crucial importance to create a competitive advantage to differentiate from the competitors and to sustain the business of the company. This thesis intends to show that a customer-focused quality management is one way to create a sustainable competitive advantage. Quality controls along the whole value chain -before, during and after production- leads to failure free products, which save costs on the one hand and have thus a positive influence on the company's revenue. On the other hand failure free products that meet the customers expectations lead to satisfied customers who build up a brand loyalty and conduct retention sales, which have a positive influence on the company's sales, market share as well as the overall image. Furthermore, this thesis points out that it is important to listen to the voice of the customers and get an insight in the customer's needs and wants. To fulfil or even exceed their expectations leads to customer satisfaction, which is a key to success in today's business world. In addition, the customer demands in regard of quality are growing continuously and new technologies are appearing on the markets on a regular basis. Therefore the producers are forced to keep to the latest technology developments and to get hold on the changing customer needs. But even without this external pressure, quality improvement is justified from a cost point of view. The applicability of a customer-oriented quality management is shown in the practical part of this thesis, when the quality of the Saab models is analyzed from the customer's perspective. Due to the arguments, outlined in this thesis, it can be summarized that a quality management with a focus on the needs of the customers in should become a core strategy of any company producing and selling products in order to create customer satisfaction and sustain the business. This thesis deals with the field of quality management in the context of customer satisfaction. To show the practical applicability of quality management, this thesis is looking at how quality management is conducted in the automotive industry, as we compare the Initial Quality Study (IQS) from the market research institute J. D. Power with a survey

that was internally conducted at the Saab Automobile AB. Today's business environment creates a growing need for quality management. Tougher competition leads to the demand for cost savings and higher [...] *Cincinnati Magazine* 1998-12 Cincinnati Magazine taps into the DNA of the city, exploring shopping, dining, living, and culture and giving readers a ringside seat on the issues shaping the region.
