**Live Art in the UK** Maria Chatzichristodoulou 2020-02-06 Since entering the performance lexicon in the 1970s, the term live art has been used to describe a diverse but interrelated array of performance practices and approaches. This volume offers a contextual and critical introduction to the scene of contemporary live art in Britain. Focusing on key artists whose prolific body of work has been vital to the development of contemporary practice, this collection studies the landscape of live art in the UK today and illuminates its origins, as well as particular concerns and aesthetics. The introduction to the volume situates live art in relation to other areas of artistic practice and explores the form as a British phenomenon. It considers questions of cultural specificity, financial and institutional support, and social engagement, by tracing the work and impact of key organizations on the UK scene: the Live Art Development Agency, Spill Festival of Performance and Compass Live Art. Across three sections, leading scholars offer case studies exploring the practice of key artists Tim Etchells, Marisa Carnesky, Marcia Farquhar, Franko B, Martin O’Brien, Oreet Ashery, David Hoyle, Jordan McKenzie, and Cosey Fanni Tutti.

**The Car Hacker’s Handbook** Craig Smith 2016-03-01 Modern cars are more computerized than ever. Infotainment and navigation systems, Wi-Fi, automatic software updates, and other innovations aim to make driving more convenient. But vehicle technologies haven’t kept pace with today’s more hostile security environment, leaving millions vulnerable to attack. The Car Hacker’s Handbook will give you a deeper understanding of the computer systems and embedded software in modern vehicles. It begins by examining vulnerabilities and providing detailed explanations of communications over the CAN bus and between devices and systems. Then, once you have an understanding of a vehicle’s communication network, you’ll learn how to intercept data and perform specific hacks to track vehicles, unlock doors, glitch engines, flood communication, and more. With a focus on low-cost, open source hacking tools such as Metasploit, Wireshark, Kayak, can-utils, and ChipWhisperer, The Car Hacker’s Handbook will show you how to: –Build an accurate threat model for your vehicle –Reverse engineer the CAN bus to fake engine signals –Exploit vulnerabilities in diagnostic and data-logging systems –Hack the ECU and other firmware and embedded systems –Feed exploits through infotainment and vehicle-to-vehicle communication systems –Override factory settings with performance-tuning techniques –Build physical and virtual test benches to try out exploits safely If you’re curious about automotive security and have the urge to hack a two-ton computer, make The Car Hacker’s Handbook your first stop.

**Revolt on the Right** Robert Ford 2014-03-17 Winner of the Political Book of the Year Award 2015 The UK Independence Party (UKIP) is the most significant new party in British politics for a generation. In recent years UKIP and their charismatic leader Nigel Farage have captivated British politics, media and voters. Yet both the party and the roots of its support remain poorly understood. Where has this political revolt come from? Who is supporting them, and why? How are UKIP attempting to win over voters? And how far can their insurgency against the main parties go? Drawing on a wealth of new data – from surveys of UKIP voters to extensive interviews with party insiders – in this book prominent political scientists Robert Ford and Matthew Goodwin put UKIP’s revolt under the microscope and show how many conventional wisdoms about the party and the radical right are wrong. Along the way they provide unprecedented insight into this new revolt, and deliver some crucial messages for those with an interest in the state of British politics, the radical right in Europe and political behaviour more generally.

**Business Economics: Theory and Application** Neil Harris 2007-06-01 ‘Business Economics: Theory and Application’ is an undaunting and accessible text that focuses on the real world of business and how this relates to economics. The links to business are far more intrinsic than in other business economics textbooks where a business “flavour” is simply added to traditional economics theory. It provides an in-depth jargon-free analysis, particularly relevant for one semester courses. A variety of case studies and questions are used throughout the text both to illustrate key points and for seminar and assignment work. Diagrams are included to aid the explanation of complex issues, and review and discussion questions are incorporated to consolidate and expand on the learning. A lecturer’s supplement accompanies the text.

**Challenging Gender Stereotypes in the Early Years** Susie Heywood 2022-09-14 What does gender equity mean for early years practitioners? What are early years settings already doing to promote gender equality, and why is this so important? How can we provide children with a solid basis from which they can grow into people who are not limited by society’s expectations of their gender? This is a manual for every early years practitioner who wishes to expand their knowledge and improve their practice around gender stereotyping in the early years. Drawing from the authors’ experience developing a public health programme tackling gender stereotypes, it explores the reasons why gender inequality is still an issue, identifies the ways it is perpetuated and provides a framework and practical tools to drive change. The framework includes an audit process to celebrate areas of success and to identify areas for development, alongside a host of suggestions on how to navigate tricky situations in creative, respectful and effective ways. With the voices and experiences of experts and practitioners woven throughout, alongside key reflections and scenarios to critically engage with, Challenging Gender Stereotypes in the Early Years challenges readers to consider their own practice, drive staff awareness and make a difference to their setting.

**Biofuels for Transport** Worldwatch Institute, 2012-05-04 The world is on the verge of an unprecedented increase in the production and use of biofuels for transport. The combination of rising oil prices, issues of security, climate instability and pollution, deepening poverty in rural and agricultural areas, and a host of improved technologies, is propelling governments to enact powerful incentives for the use of these fuels, which is in turn sparking investment. Biofuels for Transport is a unique and comprehensive assessment of the opportunities and risks of the large-scale production of biofuels. The book demystifies complex questions and concerns, such as the food v. fuel debate. Global in scope, it is further informed by five country studies from Brazil, China, Germany, India and Tanzania. The authors conclude that biofuels will play a significant role

in our energy future, but warn that the large-scale use of biofuels carries risks that require focused and immediate policy initiatives. Published in association with BMELV, FNR and GTZ.

**Critical Code** National Research Council 2010-11-27 Critical Code contemplates Department of Defense (DoD) needs and priorities for software research and suggests a research agenda and related actions. Building on two prior books-Summary of a Workshop on Software Intensive Systems and Uncertainty at Scale and Preliminary Observations on DoD Software Research Needs and Priorities-the present volume assesses the nature of the national investment in software research and, in particular, considers ways to revitalize the knowledge base needed to design, produce, and employ software-intensive systems for tomorrow’s defense needs. Critical Code discusses four sets of questions: To what extent is software capability significant for the DoD? Is it becoming more or less significant and strategic in systems development? Will the advances in software producibility needed by the DoD emerge unaided from industry at a pace sufficient to meet evolving defense requirements? What are the opportunities for the DoD to make more effective use of emerging technology to improve software capability and software producibility? In which technology areas should the DoD invest in research to advance defense software capability and producibility?

**Communities in Action** National Academies of Sciences, Engineering, and Medicine 2017-04-27 In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual’s health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. Communities in Action: Pathways to Health Equity seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

**Flood and Coastal Erosion Risk Management** Edmund Penning-Rowsell 2014-01-03 A new ‘Multi-Coloured Manual’ This book is a successor to and replacement for the highly respected manual and handbook on the benefits of flood and coastal risk management, produced by the Flood Hazard Research Centre at Middlesex University, UK, with support from Defra and the Environment Agency. It builds upon a previous book known as the “Multi-Coloured Manual” (2005), which itself was a synthesis of the blue (1977), red (1987) and yellow manuals (1992). As such it expands and updates this work, to provide a manual of assessment techniques of flood risk management benefits, indirect benefits, and coastal erosion risk management benefits. It has three key aims. First it provides methods and data which can be used for the practical assessment of schemes and policies. Secondly it describes new research to update the data and improve techniques. Thirdly it explains the limitations and complications of Benefit-Cost Analysis, to guide decision-making on investment in river and coastal risk management schemes.

Ford 2021-07-12 How to Read a Poem is an introduction to creative reading, the art of coming up with something to say about a text. It presents a new method for learning and teaching the skills of poetic interpretation, providing its readers with practical steps they can use to construct perceptive, inventive readings of any poem they might read. The Introduction sets out the aims of the book and provides some basic operating principles for applying the seven steps. In each subsequent chapter, the step is introduced and explained, relevant points of interpretative theory and methodology are discussed and illustrated with multiple examples, and the step is put into practice in a final section. Through these final sections, step by step, the book develops an extended reading of a single poem, Letitia Landon’s “Lines Written under a Picture of a Girl Burning a Love-Letter” from 1822. That reading is sustained across the whole arc of the book, providing a detailed worked example of how to read a poem. This accessible and enjoyable guide is the ideal introduction to anyone approaching the detailed study of poetry for the first time and offers valuable

PARENTING MATTERS NATIONAL ACADEMIES OF SCIENCES, ENGINEERING, AND MEDICINE 2016-11-21 DECADES OF RESEARCH HAVE DEMONSTRATED THAT THE PARENT-CHILD DYAD AND THE ENVIRONMENT OF THE FAMILY<sup>[2]</sup> €" WHICH INCLUDES ALL PRIMARY CAREGIVERS<sup>[2]</sup> €" ARE AT THE FOUNDATION OF CHILDREN'S WELL- BEING AND HEALTHY DEVELOPMENT. FROM BIRTH, CHILDREN ARE

LEARNING AND RELY ON PARENTS AND THE OTHER CAREGIVERS IN THEIR LIVES TO PROTECT AND CARE FOR THEM. THE IMPACT OF PARENTS MAY NEVER BE GREATER THAN DURING THE EARLIEST YEARS OF LIFE, WHEN A CHILD'S BRAIN IS RAPIDLY DEVELOPING AND WHEN NEARLY ALL OF HER OR HIS EXPERIENCES ARE CREATED AND SHAPED BY PARENTS AND THE FAMILY ENVIRONMENT. PARENTS HELP CHILDREN BUILD AND REFINE THEIR KNOWLEDGE AND SKILLS, CHARTING A TRAJECTORY FOR THEIR HEALTH AND WELL-BEING DURING CHILDHOOD AND BEYOND. THE EXPERIENCE OF PARENTING ALSO IMPACTS PARENTS THEMSELVES. FOR INSTANCE, PARENTING CAN ENRICH AND GIVE FOCUS TO PARENTS' LIVES; GENERATE STRESS OR CALM; AND CREATE ANY NUMBER OF EMOTIONS, INCLUDING FEELINGS OF HAPPINESS, SADNESS, FULFILLMENT, AND ANGER. PARENTING OF YOUNG CHILDREN TODAY TAKES PLACE IN THE CONTEXT OF SIGNIFICANT ONGOING DEVELOPMENTS. THESE INCLUDE: A RAPIDLY GROWING BODY OF SCIENCE ON EARLY CHILDHOOD, INCREASES IN FUNDING FOR PROGRAMS AND SERVICES FOR FAMILIES, CHANGING DEMOGRAPHICS OF THE U.S. POPULATION, AND GREATER DIVERSITY OF FAMILY STRUCTURE. ADDITIONALLY, PARENTING IS INCREASINGLY BEING SHAPED BY TECHNOLOGY AND INCREASED ACCESS TO INFORMATION ABOUT PARENTING. PARENTING MATTERS IDENTIFIES PARENTING KNOWLEDGE, ATTITUDES, AND PRACTICES ASSOCIATED WITH POSITIVE DEVELOPMENTAL OUTCOMES IN CHILDREN AGES 0-8; UNIVERSAL/PREVENTIVE AND TARGETED STRATEGIES USED IN A VARIETY OF SETTINGS THAT HAVE BEEN EFFECTIVE WITH PARENTS OF YOUNG CHILDREN AND THAT SUPPORT THE IDENTIFIED KNOWLEDGE, ATTITUDES, AND PRACTICES; AND BARRIERS TO AND FACILITATORS FOR PARENTS' USE OF PRACTICES THAT LEAD TO HEALTHY CHILD OUTCOMES AS WELL AS THEIR PARTICIPATION IN EFFECTIVE PROGRAMS AND SERVICES. THIS REPORT MAKES RECOMMENDATIONS DIRECTED AT AN ARRAY OF STAKEHOLDERS, FOR PROMOTING THE WIDE-SCALE ADOPTION OF EFFECTIVE PROGRAMS AND SERVICES FOR PARENTS AND ON AREAS THAT WARRANT FURTHER RESEARCH TO INFORM POLICY AND PRACTICE. IT IS MEANT TO SERVE AS A ROADMAP FOR THE FUTURE OF PARENTING POLICY, RESEARCH, AND PRACTICE IN THE UNITED STATES.
