The Seal of Biliteracy Amy J. Heineke 2020-02-01 This edited volume examines the Seal of Biliteracy (SoBL), a relatively new policy initiative that has received little attention in scholarly and practical literature. The contributions seek to expand the literature by presenting case studies of policy implementation in diverse contexts across the United States. This book is organized into four sections: (1) introduction to the SoBL, including history of the policy initiative and national trends in policy design and implementation, (2) case studies of macro-level policy implementation, including a diverse array of contexts across the country that have approached the SoBL in unique ways (e.g., legislation v. educational code, prioritizing world v. home languages), (3) case studies of micro-level implementation, including schools and districts that award the SoBL to diverse student populations through various language programs (e.g., English-dominant v. linguistically diverse; world language v. dual-language programs), and (4) conclusions

and future directions, including actionable next steps for policy makers, administrators, educators, and researchers. Members of various professional organizations will benefit from this text, including the National Association for Bilingual Education (NABE), Teachers of English to Speakers of Other Languages (TESOL), the American Council for Teaching of Foreign Languages (ACTFL), as well as participants in local affiliates for bilingual, English as a second language (ESL), and world language education.

Exploring Technology for Writing and Writing Instruction Pytash, Kristine E. 2013-07-31 As digital technologies continue to develop and evolve, an understanding of what it means to be technologically literate must also be redefined. Students regularly make use of digital technologies to construct written text both in and out of the classroom, and for modern writing instruction to be successful, educators must adapt to meet this new dichotomy. Exploring Technology for Writing and Writing Instruction examines the use of writing technologies in early childhood, elementary, secondary, and post-secondary classrooms, as well as in professional development contexts. This book provides researchers, scholars, students, educators, and professionals around the world with access to the latest knowledge on writing technology and methods for its use in the classroom.

Becoming a teacher Josef de Beer 2020-12-31 This book disseminates original research on learning in and from practice in pre-service teacher education. Authors such as Lederman and Lederman describe the student teaching practicum (or work-integrated learning [WIL]), which is an essential component of pre-service teacher education, as the 'elephant in the room'. These authors note that 'the capstone experience in any teacher education programme is the student teaching practicum... [a]fter all, this is where the rubber hits the road'. However, many teacher educators will agree that this WIL component is sometimes very insufficient in assisting the student teacher to develop their own footing and voice as a teacher. This is the 'gap' that this research book addresses. Most of the chapters in the book report empirical data, with the exception of two chapters that can be categorized as systematic reviews. WIL is addressed from various angles in the chapters. Chapter 6 focuses on research related to what makes Finnish teacher education so effective, and in Chapter 4 researchers of the University of Johannesburg disseminate their findings on establishing a teaching school (based on Finnish insights) in Johannesburg. Chapter 3 highlights the challenges faced in open-and distance learning teacher education contexts. Several of the chapters disseminate research findings on alternative interventions to classic WIL, namely, where "safe spaces" or laboratories are created for student teachers to learn and grow professionally. These could either be simulations, such as software programmes and avatars in the intervention described in Chapter 2; student excursions, as the findings in chapters 5, 7 and 10 portray; or alternative approaches to WIL (e.g. Chapters 11 and 12). The book is devoted to scholarship in the field of pre-service teacher education. The target audience is scholars working in the fields of pre-service teacher education, work-integrated learning, and self-directed learning. The book makes a unique contribution in terms of firstly its extensive use of Cultural-Historical Activity Theory as a research lens, and secondly in drawing on various theoretical frameworks. Both quantitative and qualitative research informed the findings of the book.

This book is your guide to blended teaching in K-12 settings. It was designed to help both pre-service and in-service teachers prepare their classes for blended teaching. The book can be accessed in several different formats at <http://edtechbooks.org/k12blended>. This book begins by orienting you to the foundational dispositions and skills needed to support your blended teaching practice. Then you will be introduced to four key competencies for blended teaching which are: (1) Online Integration - ability to effectively combine online instruction with in-person instruction. (2) Data Practices - ability to use digital tools to monitor student activity and performance in order to guide student growth. (3) Personalization - ability to implement a learning environment that allows for student customization of goals, pace, and/or learning path. (4) Online Interaction - ability to facilitate online interactions with and between students. The final chapter of the book helps you bring all four competencies together as you implement blended teaching in your classroom.
