Isoflavones—Victor R. Preedy 2012-10-01 Isoflavones remain the subject of many scientific studies most of which reveal them to have some health benefits. Coverage within this book begins with an overview of phytoestrogens in health and plants with specific reference to isoflavones, how isoflavones are found in the diet and novel compounds in nuts. Expert accounts of the chemical and biochemical research on this topic are provided followed by analytical and bioanalytical assessments. Rounding up the book are the chapters on function and effects of isoflavones which provide details on isoflavones in beverages, soy and soy products and other food delivery systems and how their function effects the thyroid, menopause, prostate, breast, bone and cardiovascular disease to name but a few. Delivering high quality information, this extensive and detailed book provides a fascinating insight into this area of health and nutritional science. It will bridge scientific disciplines so that the information is more meaningful and applicable to health in general. Part of a series of books, it is specifically designed for chemists, analytical scientists, forensic scientists, food scientists, dieticians and health care workers, nutritionists, toxicologists and research academics. Teaching and Learning in Nursing—Gregor Stiglic 2017-05-17 A significant body of knowledge is the basis for a holistic, caring and scientific evidence-based nursing education in practice for professional development. Quality teaching leads to good learning and both aspects are two of the main issues of quality assurance in nursing education today. To begin with, not all nursing students have the same levels of motivation or learning abilities. It is with cognisance of providing quality care for patients that the role of the nurse educator has to be to enhance nursing students’ learning using scientific evidence based teaching. Research around teaching and learning processes is an important part of the delivery of quality education, which in turn impacts on students’ learning results and experiences, thereby, ensuring holistic biopsychosocial care to patients. The main aim of teaching and learning in nursing, at all levels, is to enhance the nurses’ contribution to assist the individuals, families and communities in promoting and preserving health, well-being and to efficiently respond to illnesses. We hope that this book can be used as a resource to increase the body of knowledge in teaching and learning in nursing, thereby enhancing the role and contribution of health care professionals to clinical practice.

Pharmaceutical Compounding and Dispensing—John F. Marriott 2010 Pharmacists have been responsible for compounding medicines for centuries. Although most modern medicines are not compounded in a local pharmacy environment, there are still occasions when it is imperative that pharmacists have this knowledge. Pharmaceutical Compounding and Dispensing provides a comprehensive guide to producing extemporaneous formulations safely and effectively. The book covers three core sections: the history of compounding; pharmaceutical forms and their preparation; product formulae. This is a modern, detailed and practical guide to the theory and practice of extemporaneous compounding and dispensing. Fully revised and updated, this new edition will be an indispensable reference for pharmacy students and practicing pharmacists. Supplementary videos demonstrating various dispensing procedures can be viewed online.

Pheochromocytoma—Hendrik Lehnert 2004 Pheochromocytomas are rare, mostly benign tumors of the adrenal medulla whose symptoms are caused by a tumor-induced secretion of catecholamines. This book provides an overview of current knowledge on the clinical situation, diagnosis and therapy of the disease as well as an extensive discussion of novel aspects in the molecular basis of this disease such as the recognition of new tools in molecular biology. The endocrine diagnosis is based on precise knowledge of tumor metabolism of catecholamines and their metabolites and today comprises laboratory methods with a high sensitivity and specificity. As approximately one quarter of these tumors arise in the context of a familial disease, such as multiple endocrine neoplasia type 2, von Hippel-Lindau syndrome, neurofibromatosis type 1 or familial paragangliomas, the genetic diagnosis is becoming increasingly relevant. Equally indispensable are imaging methods such as 123I-MIBG scintigraphy or octreotide scintigraphy, which can be employed as a complementary approach in e.g. malignant tumors. The surgical therapy is clearly based on the nature of the disease; in sporadic unilateral as well as familial bilateral pheochromocytoma a lateral endoscopic approach is chosen. The treatment of malignant pheochromocytoma is mainly based on the use of nuclear medical techniques and selected chemotherapeutic approaches. This book is essential reading for clinicians and scientists in the fields of endocrinology as well as oncology, surgery and nuclear medicine.

The Glory of Sri Sri Ganesh: Mahasweta Debi 2003 The Glory of Sri Sri Ganesh shows the lives of the underdogs the Lachhima, the Bhalokho, the Mohoro and the Harans as a contrast to the lives of their all-powerful overlords the Medinis and Ganeshes. Lachhima, whose leashed bitterness and anger of a lifetime against Medini and Ganesh is liberated at the end of the novel when Ganesh beggs her to save his life, decides to save himself, but on her own terms. The title of the work itself becomes a tool for subversion in this sprawling novel which takes the reader through a multilayered narrative into the socio-economic malaise of post-independence rural India. Mahasweta Devi’s corrosive humour and cryptic style are at their best as she takes on issues of agrarian land relations, inter-caste violence, so-called rural development and position of women in rural India. Considered one of Mahasweta Devi’s most important works, this novel, written in 1981, appeared shortly after her seminal Chotti Munda and His Arrow. The hope of liberation continued in Chotti Munda continues in this book. As the author says, Chotti Munda talked of the dream of the dispossessed tribals uniting in struggle with the equally marginalized low caste communities, while this novel shows how being landless and being born low caste is almost inevitably linked in India. Mahasweta Devi is one of India’s foremost writers. Her powerful fiction has won her recognition in the form of the Sahitya Akademi (1979), Jaanpath (1996) and Ramon Magsaysay (1996) awards, the title of Officier du Ordre Des Arts Et Des Lettres (2003) and the Nonino Prize (2005) amongst several other literary honours. She was also awarded the Padmaseer in 1986, for her activist work among dispossessed tribal communities. Ipsita Chanda is a translator who also teaches Comparative Literature in Jadavpur University.

Yakuza Moon-Shiko Tendo 2010-07-15 Yakuza Moon is the shocking, yet intensely moving memoir of 37-yearold Shiko Tendo, who grew up the daughter of a yakuza boss. Tendo lived her life in luxury until the age of six, when her father was sent to prison, and her family fell into terrible debt. Bulied by classmates who called her “the yakuza girl,” and terrorized at home by a father who became a drunken, violent monster after his release from prison, Tendo rebelled. A regular visitor to nightclubs at the age of 12, she soon became a drug addict and a member of a girl gang. By the age of 15 she found herself sentenced to eight months in a juvenile detention center. Adulthood brought big bucks and glamour when Tendo started working as a bar hostess during Japan’s booming bubble economy of the nineteen-eighties. But among her many rich and loyal patrons there were also abusive clients, one of whom beat her so badly that her face was left permanently scarred. When her mother died, Tendo plunged into such a deep depression that she tried to commit suicide twice. Tendo takes us through the bad times with warmth and candor, and gives a moving and inspiring account of how she overcame a lifetime of discrimination and hardship. Getting tattooed, from the base of her neck to the tips of her toes, with a design centered on a geisha with a dagger in her mouth, was an act that empowered her to start making changes in her life. She quit her job as a hostess. On her last day at the bar she looked up at the full moon, a sight she never forgot. The moon became a symbol of her struggle to become whole, and the title of the book she wrote as an epitaph for herself and her family.

Moreover, he extends his analysis to include not only the litigants, but also the lawyers, the jurors, and the judge, describing how their social characteristics can also influence a case. Sociological Justice introduces a new field of legal scholarship that will have important consequences for the future of law: the sociology of the case. Black discusses how lawyers can use the sociology of the case to improve their practice and, for those interested in reform, he suggests ways to minimize bias in the courtroom. Beyond this, Black demonstrates that modern jurisprudence, with its assumption that like cases will be treated in like fashion, is out of touch with reality. He urges the adoption of a new sociological jurisprudence, with a new morality of law, that explicitly addresses the social relativity of justice. A major contribution to legal scholarship, this thought-provoking volume is essential reading for anyone interested in law and justice in modern society.

Living In Hell-Authoress Secret 2021-03-12 My name is Bren Miller, and I am the youngest of five children. I am twelve years old, and my mother is an LPN, but she is a closet crackhead who also pops perks. My mother's name is Gina, she is 5 ft 5 with a little waist and big booty. She always kept her hair appointment every two weeks like clockwork to keep her head snatched before she met D. Mommy always bragged on her body, and I was sickened by it. I do admit that my mommy looked all right but what about the things me and my siblings needed. Mommy never cared about that unless she was going to show us off or take us to visit grandma. Ugh! I can't wait to get grown so that I can get out of this house.
