IRIS | Page 2: Second Language Acquisition
Research has shown that students with poor oral language proficiency struggle with academic skills such as reading fluency and reading comprehension. Despite this, in each of the stages of language acquisition, the student’s receptive language (i.e., understanding) is generally better than his or her expressive language (i.e., speaking).

Second language - Wikipedia
A person's second language, or L2, is a language that is not the native language (first language or L1) of the speaker, but is learned later (usually as a foreign language, but it can be another language used in the speaker's home country). A speaker's dominant language, which is the language a speaker uses most or is most comfortable with, is not necessarily the ...
